

## WHO ARE WE?

The Northern California and Nevada Medical Library Group, a chapter of the Medical Library Association, is a community of health information professionals. We benefit our diverse membership by sharing resources and collections as well as solutions to common problems. We offer educational programs on current issues and technologies. We advocate for libraries and library workers.

NCNMLG is not just for librarians. We work in academic institutions, hospitals, pharmaceutical companies, and health policy institutes. We work for publishers, software vendors, insurance companies, and information aggregators. Some of us work independently.

Join NCNMLG and connect with the people and resources you need to stay informed, build skills and meet your career goals.
