A CHAPTER OF THE MEDICAL LIBRARY ASSOCIATION

NCNMLG Newsletter

President's Message from David Brown

I suppose most of us are familiar with the general outline from grade school: the story of how humankind progressed from nomadic hunter-gatherers to settled in one place agriculturalists, and of how the eventual surplus of food provided by the labor of fewer and fewer in the group allowed for the luxury of specialization. Some women became healers, some men wheelwrights or blacksmiths, others in the group weavers or potters or scribes. A consequence, however, not often pointed out was that if a settled group's specialist in one activity or another was injured or died, the group could be abruptly left without a worker to supply that need. I remember several folk tales based on the need for a new blacksmith for the village at the death of the former expert.

Nowadays in our world this problem is rarely noticed or felt; there are so many practitioners of every "specialty" that one more or less is hardly of importance; there are always others to take up the slack. And the proliferation of technology and online provisions of resources and materials has further ameliorated the situation.

The NCNMLG is still, however, more or less in the village state of human progress; we have one person assigned to most tasks and depend upon him or her for the smooth performance of their contribution to the running of our organization. For example, I am president for the current year, but I have also for the past 6 years been the inter-library loan coupon manager, a state of affairs that has worked reasonably well—until now. As most of you know, I have had health problems this past month, problems serious enough to result in coronary bypass surgery followed by some weeks of recuperation; I will not be returning to work until the middle of March. As a consequence the NCNMLG village is without a blacksmith or, at least, without a coupon manager.

I would like to push the analogy a touch further. I believe the NCNMLG needs, at least in the case of interlibrary loan payments, seriously to consider moving into the 21st century, that is, into giving up the paper-based coupon system and supporting and using exclusively the

EFTS system provided by the University of Connecticut (<https://efts.uconn.edu/efts/common/index.html>).

Many if not most of our members are already subscribers to this system; some members so strongly advocate its use that they are reluctant if not outright unwilling to use any other and do not exchange loans with libraries who do not do so. I am not yet ready to go so far as that, but I cannot prevent myself from pointing out that were all our members using that system and the paper coupon system disbanded, my ill-health would have had no consequences for our members in their interlibrary loan activity.

Later this year, when I am once more on the spot President, I will actively solicit the thoughts and desires of our membership on this issue. In the meanwhile, although it is cold outside today, the sun is shining and anyone who cares to look closely at the trees and the shrubs and the small growing plants in the gardens of the city and the fields in the country will find the first stirrings of spring growth. Already iris and tiny narcissus are blooming here and there. I wish you all a healthful and happy new year and fresh spring, and I look forward to working with you once more in a few weeks' time.

David W. Brown
President, 2006-2007

No Minutes of NCNMLG Business Meeting / Next Meeting March 7

The minutes for the last meeting were not available in time to be published in this issue of the newsletter. They will be published in the next issue. The next NCNMLG membership meeting will be Wednesday, March 7, from 9:00 AM to 10:45 AM, at Kaiser Permanente, 1 Kaiser Plaza, Oakland, CA, followed by the MLA Webcast *Survival of the Fittest: Strategies to Prove Your Library's Value* http://www.mlanet.org/education/distance_ed/marketing/index.html from 11:00 AM to 1:00 PM. Please RSVP Keir Reavie (530-752-6166, ktreavie@ucdavis.edu) by Friday, March 2nd.

NCNMLG's Mentoring Program Is Seeking New Mentors & Mentees

By Ysabel R. Bertolucci

NCNMLG recognizes the need and importance of fostering and developing health sciences librarians. A large percentage of librarians of the baby-boomer generation will be retiring in the next decade. Technology is changing the profession so rapidly that the daily work of librarians looks nothing like it did even 5 year ago.

- How do we recruit new health sciences librarians?
- How do we keep up with the technology?
- How do we transfer our skills from one type of library to another?
- How do we publicize the fun and excitement of what we do?
- How does a new professional learn the ropes, learn the culture, learn to thrive? (ok, so I work for Kaiser Permanente ☺)

The Answer: Mentoring. NCNMLG has offered a mentor to all new members for a number of years. It's been an informal process; a seasoned member has reviewed the new member application and sifting through the membership list, selects a mentor. This worked fine since most of the new members were librarians with experience in another type of library who wanted informal discussions with someone in their type of position—but now we're recruiting people from library school and health career activities who want a more formal idea of what health sciences librarians do. We also have members changing jobs and finding themselves in different types of positions they know nothing about. MLA and NCNMLG are looking to provide a more formal structured program.

I've spent the last year reviewing the MLA activities and those of neighboring chapters to develop a program for NCNMLG that brings together all the best practices. If you are interested in becoming a mentor please look at the MLA Mentoring Resources page at www.mlanet.org/mentor. MLA personal members and institutional representatives can register in the MLA Mentoring Database to be considered for mentoring in NCNMLG. This database will be used as the initial resource in matching a mentor to a mentee. If you are an NCNMLG member only, please fill out the form and send it to me. Mentors do not necessarily need to be "seasoned" librarians. Many students or newbies would appreciate a mentor who is early in their career who could give students an idea of what a current job is like and the possibilities that are available.

Even if you've been a health sciences librarian for awhile you may wish some assistance with a new job duty or technology. You, too, can be paired with an NCNMLG member. Please fill out the form on pages 3-4 and send it to me. I can match you to a mentor or you can go to the mentoring database on MLANET at www.mlanet.org/mentor and select someone. If you want me to make the formal instruction I would be happy to do so!

Currently there are only 4 NCNMLG members listed in the MLA Mentoring database. Please consider adding your name to the MLA Mentoring Database. I have three new members who are looking for a buddy!

NCNMLG Mentor Program Application

Applying **for** a mentor

Applying **to be** a mentor

*This form is for NCNMLG members
Who are not also members of MLA
MLA individual and institutional members please enter
your information in the MLA Mentoring Database
(<http://www.mlanet.org/mentor/index.html>)*

Name: _____

Institution: _____

Address: _____

City: _____ State: _____ Zip: _____

Telephone: _____ Fax: _____

Email: _____

Position/Title: _____ Years in Position: _____

Graduate School (proteges): _____

Member of: **NCNMLG** **MLA** **Other**

If you are applying **to be** a mentor, select the area(s) in which you would like to participate. If you are applying **for** a mentor, select the area(s) for which you would like a mentor.

I. Professional Interests/Expertise:

- | | |
|---|---|
| <input type="checkbox"/> Administration | <input type="checkbox"/> Automation |
| <input type="checkbox"/> Bibliographic Instruction | <input type="checkbox"/> Cataloging |
| <input type="checkbox"/> Collection Development | <input type="checkbox"/> Consulting |
| <input type="checkbox"/> Consumer Health Information | <input type="checkbox"/> Electronic Resources |
| <input type="checkbox"/> End-user Training | <input type="checkbox"/> Media |
| <input type="checkbox"/> Online Searching | <input type="checkbox"/> Reference |
| <input type="checkbox"/> Serials | <input type="checkbox"/> Web Design/Maintenance |
| <input type="checkbox"/> Evidence Based Practice | |
| <input type="checkbox"/> Other (Please Specify) _____ | |

II. Type of Library or Department (currently employed or interested in working)

- Academic
- Consumer Health
- Corporate
- Hospital
- Pharmaceutical
- Other (Please Specify) _____

III. I would like to receive mentoring OR would be willing to mentor in the following areas: (check all that apply)

- Assistance with AHIP application process
- Buddy at NCNMLG program meetings
- Buddy at NCNMLG Joint Meeting
- Buddy at MLA Annual Meeting
- Career guidance (new to the profession, career change to health sciences librarianship)
- Assistance with research/projects
- Assistance with writing for publication
- Assistance with grant writing
- Mentoring relationship in the areas of professional interest above
- Other (please specify) _____

IV. Mentors: Would you be available for presentations, career fairs, speaking engagements, conferences, or exhibits at area graduate schools, colleges or high schools?

- San José State/Cal State Fullerton Program
- UCLA
- University of Arizona, Tucson
- Other (please specify) _____

V. Preferences:

- Male Female No preference
- I would prefer someone within 25 miles of my location No preference
- I would prefer to be contacted by:**
- Email Telephone Mail Fax

Any further comments you wish to make regarding your participation would be welcome. Feel free to attach additional sheets if necessary.

Next Steps: You will be notified when a possible match is available. Mentor and protégé applicants will receive additional information about the program. When the match is complete, the individuals involved will maintain the arrangements of the mentor experience. Participants may apply as often as they wish.

Please return form to:

Nominations Sought for NCNMLG Elections in March

Do you have someone in mind who would be a great officer for NCNMLG (including yourself)? Please contact Marilyn Tinsley or Christopher Stave (mtinsley@stanford.edu; cstave@stanford.edu) by March 1 with your nomination. We will be glad to discuss the responsibilities of any of the offices in more detail.

The slate of candidates for NCNMLG's 2007-08 officers will be presented to the membership at our meeting on March 7; nominations from the floor will also be accepted at that time.

Responsibilities of the officers, in brief:

President – Preside over the meetings and affairs of NCNMLG; the Vice-President/President-Elect assumes these duties automatically

Vice-President/President-Elect – arrange programs for NCNMLG, fill in for the president if needed; serve as President and as Past President in subsequent years

Secretary – prepare and distribute meeting minutes, handle correspondence

Treasurer – prepare the annual budget and handle all monies coming in, as well as disbursing all payments for NCNMLG; present financial reports at meetings

NCNMLG Nominating Committee – organize and run an election to elect a new slate of officers (2 elected members plus an appointed member)

MLA Nominating Committee candidate – run for election on the MLA ballot; if elected, help with selecting nominees for MLA elections

Chapter Council Representative and Alternate – represent NCNMLG at Chapter Council meetings at MLA; transmit information between the Council and the Chapter (Note that these positions are currently filled)

NN/LM Workshop on Measuring Your Impact: Using Evaluation to Demonstrate Value at UCSF Monday, March 5

The Librarians Association of the University of California, San Francisco (LAUC-SF) is pleased to host the workshop, **Measuring Your Impact: Using Evaluation to Demonstrate Value**, presented by the NN/LM, [Outreach Evaluation Resources Center](#).

Date: Monday, March 5, 2007, 9 a.m. – 4 p.m.

Place: UCSF Library and Center for Knowledge Management

Instructor: Susan Barnes, Assistant Director, NN/LM Outreach Evaluation Resource Center

The objective of the workshop is for librarians to learn how to evaluate their library's services and show the value of the services. The outcome for the class is that librarians will be able to show the value of their library's services. Participants will become familiar

with an evaluation process and will take away methods and tools for assessment, evaluation planning, creating logic models, data collection, data analysis and reporting. The workshop will feature group exercises that move participants through the steps of an evaluation process. There will also be student discussion and exercises in addition to lecture.

More information is available at

http://nmlm.gov/evaluation/workshops/measuring_your_impact/index.html.

There is no charge for the workshop. However, participation is limited to 25 people, so **registration is required**. You may register by emailing lisa.mix@library.ucsf.edu. First priority will be given to UCSF Library staff and affiliates.

Apply for CAPHIS Outstanding Consumer Health Information Service Award

This newly established award is offered by the Consumer and Patient Health Information Section of the Medical Library Association to recognize individuals who have made outstanding contributions to the field of consumer health librarianship. The recipient of the award will be presented a plaque and \$500.00 at the CAPHIS membership meeting during the MLA annual meeting in Philadelphia.

Nomination Requirements and Eligibility:

1. Recipient must attend the CAPHIS membership meeting during the MLA annual meeting in Philadelphia to accept the award.
2. Members of the CAPHIS Executive Board are not eligible for the award.
3. Recipient is not required to be a member of MLA or CAPHIS.
4. Nominations must specify how the nominee exemplifies outstanding contributions to consumer health librarianship through anecdotes and/or evidence. Self-nominations are also encouraged.

Examples of model customer service activities can include, but are not limited to:

- Conducted outreach programs
- Provided instruction on information access to consumers

- Made presentations of posters and/or papers at professional meetings
- Wrote consumer health publications in the professional literature
- Enhanced the work of CAPHIS for the profession
- Provided leadership to CAPHIS

Nominations should be in writing in MS Word and sent electronically via e-mail to the chair of the CAPHIS Awards Committee:

Terri Ottosen
 Consumer Health Outreach Coordinator
 National Network of Libraries of Medicine,
 Southeastern Atlantic Region
 University of Maryland, Baltimore - Health Sciences
 and Human Services Library
 601 West Lombard Street
 Baltimore, MD 21201
 E-mail: tottosen@hshsl.umaryland.edu

Nominations must be received by April 1, 2007.

Please note: Only the award recipient will be notified by April 15, 2007. The award recipient is responsible for own expenses to attend the meeting.

MLA, Medical Librarians and Health Information Literacy

Submitted by Judy F. Burnham

Medical librarians often serve two roles. One role is as a member of healthcare teams providing quality patient information, and the other is working with patients and their families to understand the information provided. There is often a disconnect between the two groups.

Often? According to the recently reported National Assessment of Adult Literacy (NAAL) data only 33% of people with graduate degrees and 4% of high

school graduates were health literate in 2003. To see the full report, go to <http://nces.ed.gov/naal/>.

What does this mean for members of the healthcare teams? What does this mean for the patient population?

MLA 2007 in Philadelphia offers a look at the role of the medical librarian in improving health information literacy, providing resources created for people who need help with health information, developing new

roles and partnerships to meet these literacy needs, and helping to assure that patient education resources are culturally and linguistically appropriate. The **Health Information Literacy: rEvolution in Roles** session will be held on Wednesday, May 23rd from 10:30 am to 1 pm.

Janet Ohene-Frempong, the session's keynote speaker and a founding member of the Partnership for Clear Health Communication, and a panel of librarians, moderated by **Amy Frey** from the Hospital for Special Care in New Britain, CT, will talk about their experiences in the field. Panel members are **Micki McIntyre**, developer of the HealthyNJ website (www.healthynj.org) and partners with Newark Public Library and La Sala Hispanoamericana; **Andrea Kenyon**, who works with the Philly Health Info project (www.phillyhealthinfo.org); **Dr. Lynda Baker**, PhD, a faculty member at Wayne State University specializing in health information; and

Marge Kars, manager of the Bronson Health Sciences Library, HealthAnswers (<http://www.bronsonhealth.com>), and the Bronson Referral and Information Center at Bronson Methodist Hospital in Kalamazoo, MI.

Come to the session early, or stay a little longer, and see a group of posters highlighting exciting and innovative health information literacy projects from around the country. Also, before and during the sessions, short video vignettes will present even more ideas. After the session, Beth Wescott will be offering CE 3127 [Easy to Read Health and Wellness Material for Consumers: Recognizing It, Finding It, Writing It, and Rewriting It](#). Sign up early!

MLA is also inviting public librarians to join us. There's more, but you will have to join us in Philadelphia to find out everything!

The MLA's Leadership and Management Section: Helping to Create New and Better Leaders

Submitted by Brian Bunnett, Chair, LMS Membership Committee

"Leaders are born, not made." We've all heard this hackneyed expression at some point or other. Is there some inborn, indefinable quality that sets leaders apart from the common run of humanity?

It is safe to assume that the many members of the Leadership and Management Section (LMS) do not think so. Or, rather, they believe that there is such a quality but it is neither inborn nor indefinable. This quality is called application, or assiduity, or preparation. Its distinguishing characteristics are hard work, lifelong learning, and good mentoring.

This view of leadership is, on some level, discouraging. It suggests that we must exert ourselves, that we put forth an effort. We can't just lead effortlessly and naturally, as we might have liked to imagine previously.

If leadership is something that has to be worked at then at least there is the LMS to make this task a little less burdensome. The LMS exists in order to provide

opportunities for its members to learn the skills they will need to become, or remain, effective leaders and managers. Membership in the section is open to all MLA members. If you do not work as a manager or administrator, but think that your career will take you in this direction, then you are certainly encouraged to join the LMS.

Doing so is sure to be of benefit. The LMS allows its members to network with colleagues interested in leadership and management by promoting research and professional development activities. It accomplishes this goal through programs and symposia held at MLA annual meetings, through *The Leading Edge* – its excellent newsletter, through its listserv, and through social events and business meetings.

More information about the LMS is available on its web page at: <http://www.lms.mlanet.org>
An application form is available at:
http://www.lms.mlanet.org/join_us_form.html.

NLM News

Now Available: Updated Drug Terminology Tool—RxNav

An updated version of the Web-based browser RxNav is now available to search RxNorm, the NLM database of standard names for clinical drugs that references the names of approximately 17,000 clinical drugs from several sources. RxNav displays graphical links from clinical drugs, both branded and generic, to their active ingredients (e.g., Ibuprofen), drug components (e.g., Ibuprofen 200 MG) and drug forms (Ibuprofen Oral Tablet). It also associates generic with brand names (e.g., Ibuprofen / Advil).

Every aspect of the RxNorm database can be queried through RxNav, including the names and codes of drugs and components in the drug resources referenced by RxNorm. Spelling suggestions are offered when no exact match is found in RxNorm for a given input term. RxNav accesses the RxNorm server at NLM, which is updated monthly.

"We hope that our tool makes it easier for physicians and pharmacists to deal with electronic drug prescription and to integrate drug information from various sources," says Dr. Olivier Bodenreider, one of the co-developers of the software.

RxNav is available at:

<http://mor.nlm.nih.gov/download/rxnav/>

NLM Announces the New Bioethics Information Resources Web Page

The National Library of Medicine (NLM) has collected, indexed, and provided access to bioethics-related literature for many years. Now NLM offers a consolidated Bioethics Information Resources Web page at <http://www.nlm.nih.gov/bsd/bioethics.html>. This new easy-to-use electronic resource will assist users, whether they are specialists in the field or researchers or clinicians or the general public, in finding the bioethics information they need by searching NLM databases as well as linking to other Federal government and outside resources. Examples of featured resources include:

*Bioethics-filtered search boxes for MEDLINE/PubMed and NLM Catalog;

*Links to other NLM databases or information resources, such as Genetics Home Reference, MedlinePlus, and the Go Local service for finding local resources for health-related issues;

*NLM Gateway Links to NIH's Bioethics Resources on the Web;

*Links to other bioethics-related web sites, such as the National Bioethics Advisory Committee and the Kennedy Institute of Ethics' National Reference Center for Bioethics Literature (NRCBL) at Georgetown University.

The literature of bioethics focuses on the rights, relationships, and duties of healthcare professionals and their patients; the social impact of biomedical, behavioral, and genetic research and technology; and the development of public policy for both the delivery of health care and the conduct of research. As a cross-disciplinary subject of interest to health sciences, social sciences, law, philosophy, religion, and the popular media, bioethics relates to the mission of every institute and center at the National Institutes of Health (NIH).

NLM welcomes user comments on this new, centralized Web page. Use the Contact NLM link from the new Web page.

MeSH Subheading Consolidation Decision

January 30, 2007 [posted]

Last year, the National Library of Medicine (NLM) proposed to consolidate the 83 existing qualifiers (subheadings) in the Medical Subject Headings and create a smaller set. The goal was to make the use of qualifiers easier for the searching public. NLM distributed a background paper within the National Network of Libraries of Medicine, whose members also posted it on a number of widely seen listservs. At the Medical Library Association Annual Meeting in 2006, Dr. Stuart Nelson, Head of Medical Subject Headings, and those in attendance had a lively dialogue on the proposed changes.

Over the intervening months, NLM staff analyzed all comments, suggestions, and feedback. We considered the potential impact on the searching public, Network libraries, and the internal processes at NLM. Ultimately, in part due to budget constraints and limited resources, NLM has made the decision to retain the qualifiers in their present form. We hope to concentrate our efforts on other ways to improve searching and retrieval for all users. We greatly appreciate the many thoughtful comments received, and thank all those who provided input.

"Books" Removed from Links Menu in PubMed February 06, 2007 [posted]

The "Books" option on PubMed Links has been removed. This is the function that used to link the content of PubMed abstracts to the Bookshelf via concept terms. Books continue to be linked from a PubMed abstract if the corresponding article has been cited in a book through the link "Cited in Books." An improved feature providing concept links from PubMed to Bookshelf Books will be added in the future.

To receive an e-mail notification of additions to the Bookshelf, go to the Books-announce information page:

<http://www.ncbi.nlm.nih.gov/mailman/listinfo/books-announce>
